# OFFICE-BASED TREATMENT OF OPIOID DEPENDENCE with BUPRENORPHINE

## OVERVIEW

This course is presented in two related segments. Day 1 provides an overview of the office-based management of patients with addictive disease, with special emphasis on prescription drug abuse and pain management complicated by addiction. Day 2 of the course is focused on the appropriate use of buprenorphine. The Drug Addiction Treatment Act of 2000 (PL106-310, Section 3502) permits physicians who are trained or experienced in opioid addiction treatment to obtain waivers to prescribe certain narcotic drugs in Schedule III, IV, or V of the Controlled Substances Act, in their office practices or in a clinic setting, for the treatment of opioid dependence. Both buprenorphine and the combination of buprenorphine with naloxone are approved by FDA for use in detoxification and maintenance treatment of opioid dependence.

As part of the requirements to obtain the waiver, physicians without specified experience must complete not less than 8 hours of training. The American Society of Addiction Medicine (ASAM) is authorized to provide this training. Physicians who complete this course will meet the training qualification under the new law and will receive an ASAM certificate of attendance suitable to send to the Secretary of HHS along with the request for the waiver. If you give ASAM permission to do so, ASAM will report your name directly to the Secretary of HHS within 4 weeks of the program, if you have attended the full 8 hours of Day 2, eliminating the need for you to send the ASAM certificate of attendance.

## WHO SHOULD ATTEND

This program is recommended for primary care physicians, addiction physicians, general psychiatrists, and pain management physicians.

## EDUCATIONAL DESIGN AND METHODOLOGY

This program will use large lectures, case studies, role-playing and patient interviews.

## LOCATION

The program will be held at the Cherry Valley Lodge, 2299 Cherry Valley Road, Newark, Ohio 43055. The Cherry Valley Lodge can be reached at (800) 788-8008 or (740) 788-1200. A confirmation letter and map will be mailed to you.

## LEARNING OBJECTIVES

### DAY 1

After attending this session, participants will be able to:

- Discuss the principles of a chronic illness model of chemical dependence
- Utilize the CAGE Questionnaire for addiction screening
- Perform the diagnostic workup of a chemically dependent patient
- Describe the therapeutic benefit of a brief intervention
- Utilize the SOAPE and DEATH mnemonics when presenting the diagnosis
- Utilize the substance abuse assessment algorithm to guide treatment plans
- Reformulate a treatment program with a patient who has relapsed
- Describe the magnitude and severity of the problem of substance use in Seriously Mentally Ill (SMI) patient populations
- Identify the diagnostic criteria for substance dependence and acute chronic pain

### DAY 2

After attending this session, participants will be able to:

- Describe prerequisites for a physician to begin to prescribe buprenorphine in office-based practice
- Discuss clinically relevant pharmacological characteristics of buprenorphine
- Identify factors to consider in determining if a patient is an appropriate candidate for office-based treatment
- Describe induction and maintenance protocols
- Discuss strategies for integrating psychosocial care with office-based pharmacological treatment
- Discuss treatment strategies for management of chronic and acute pain in patients in maintenance treatment for opioid dependence

## ACCREDITATION

**The Case University is accredited by the Accreditation Council for Continuing Medical Education to provide Continuing Medical Education for Physicians.**

### DAY 1

The Case School of Medicine designates this educational activity for a maximum of 8 hours in Category 1 credit toward the AMA's Physician Recognition Award. Each physician should claim only those hours of credit that he/she actually spent in the educational activity.

### DAY 2

The American Society of Addiction Medicine designates this educational activity for a maximum of 8 hours in Category 1 credit toward the AMA's Physician Recognition Award. Each physician should claim only those hours of credit that he/she actually spent in the educational activity.

## ACKNOWLEDGEMENTS
